

Pesticide Drop-Off Program

In anticipation of White Rock's new pesticide bylaw, you're invited to drop off any remaining domestic pesticides on Sundays during the month of September at the White Rock Farmer's Market (15154 Russell Ave).

Please ensure that containers are tightly sealed and clearly marked with both a poison symbol (i.e. skull and crossbones) and a pest control product number (e.g. PCP Reg #). Only products that can be identified will be accepted.

Note that fertilizer, commercial, industrial or agricultural products will not be collected. Empty containers or products that are leaking or are improperly sealed will also be rejected.

To learn more, contact Environmental Coordinator Marlene Fuhrmann at 604.541.2192.
